Improving national biosecurity outcomes through partnerships

Nov. 1, 1933.] *Agricultural Gazette of N.S.W.* 819

Fruit Flies.
THE LAW COMPELS YOU TO CONTROL THEM.

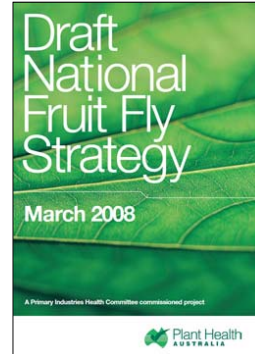

A determined effort is to be made this season to lesson the toll exacted by fruit-flies. To this end, the Department and the New South Wales Fruit-growers' Federation are combining in an effort to gain the wholehearted support of not only growers, but also urban dwellers who may have only a few trees, but which may be a breeding ground for as many fruit-flies as the most neglected commercial orchard. Coloured posters depicting the methods of control will be displayed on railway stations, in schools and elsewhere, while leaflets describing in detail the control measures will be distributed freely. Being also assured of the co-operation of the press, the campaign of enlightenment on fruit-fly control measures should prove much more effective than merely relying upon a rigid enforcement of the provisions of the Fruit Diseases Act, which imposes severe penalties for neglect to carry out the prescribed control measures.

National Fruit Fly Strategy (2008)

- Strategy developed over 18 months
- WTO-SPS Agreement
- Increasing focus on phytosanitary measures
- Impact of losing key agrichemicals
- Increasing horticultural production
- Importance of maintaining international trade

The outcome...

Effective, efficient and sustainable pest management, achieved through innovative technical and systems capability that maintains and enhances market access to meet current and future needs.

Improving national biosecurity outcomes through partnerships

The goal of this meeting

- Understanding how fruit fly management has changed
- Determining how the changes to fruit fly management, the tools available, and industry aspirations impact the 20 recommendations in the National Fruit Fly Strategy
- Identifying the priority areas for the next 10+ years
 - Update the National Fruit Fly Strategy
- Speakers – updates on current activities, perspectives and opportunities
- On-table discussions – clarifying and capturing the knowledge and aspirations of the “brains trust”
- Feedback – your priorities and areas of greatest impact

Improving national biosecurity outcomes through partnerships

Symposium Overview

Today

- 10:30am – 12:30pm The fruit fly situation and industry goals
- 1:15pm – 2:45pm Maintaining access to markets
- 3:15pm – 4:45pm Research and development activities

Tomorrow

- 9:00am – 10:45am New management tools and approaches
- 11:15am – 12:45pm Extension
- 1:30pm – 3:00pm Workshop session
- 3:00pm – 3:30pm Summary and next steps
